

GIO

Z
COLLECTION

THE STORY

INSPIRED BY AN ITALIAN SEASIDE SEASIDE HOLIDAY

Gio is a contemporary interpretation of classic patterns and materials. The subtle monochromatic pallet or the more bold tri-color feels both modern and timeless.

Each pattern can be used by itself or in combination with others to create a sophisticated patchwork. The opportunities for variation are limitless allowing each design to be spellbindingly unique.

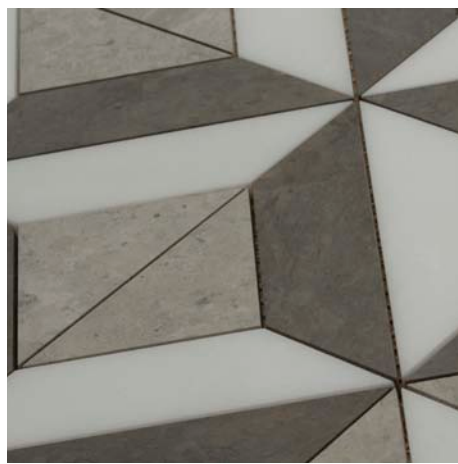

MONOCHROMATIC

Z
COLLECTION

Beautiful Italian Calacatta Marble stands alone while reflecting the GIO patterns with three amazing finishes. This honed, polished and sand blasted mosaic blend is designed to please. Excellent choice for wall or floor applications.

TRI-COLOR

Would like to have more pop? GIO Tricolor application is divine. Pure white marble paired with Fumo and Strada Limestones in honed finish. Excellent choice for wall or floor applications.

1 INSPECT BEFORE YOU START

Please review each tile for any visual defects and cull undesirable pieces aside. Natural stone has a high color variation and each piece is unique. Natural color variation is not a defect but an advantage. Dry racking natural stones before installation is a work of art. Ask your installer to dry rack the material for the best results. Visual claims after installation are not covered by manufacturer's product warranty.

2 SEAL BEFORE YOU GROUT

Pre-sealing before installation is highly recommended as this is a porous material. Especially darker grouts tend to change the overall look of the stone, so seal before you grout to protect the natural look. You can choose a grout that doesn't require sealing to save time.

3 DO NOT USE EPOXY

Lighter marbles can be discolored when exposed to Epoxy. So if you are working with marble such as Bianco Carrara, Thassos, Dolomite etc. please do not use Epoxy adhesive, Epoxy Grout or Epoxy cleaners such as Blaze.

4 USE MARBLE MORTAR

Marble is heavier than man made tile so it requires a heavier set adhesive. Tile should be back buttered for full contact. Installers must ensure 100% coverage as per TCNA guidelines. For lighter color stones, white mortar is recommended.

5 CLEANING

Please clean your tiles with a neutral (PH 7) cleaner. Avoid contact with harsh chemicals as these chemicals can harm the surface or cause discoloration
